ABSENTS of POLYVINYLCHLORIDE

We have contacted our raw material sheet supplier, and the response is that the PET sheet we buy does not contain any Polyvinylchloride, it does not contain any food substances or products listed in Regulation EU 1169/2011. Said substances are neither intentionally nor unintentionally added during manufacturing or conversion.

You must make your own determination that your use of the product(s) is safe, lawful, and technically suitable in your intended applications.

This certificate is continuing and shall remain in full force and effect until revoked in writing. This version supersedes all previous certificates that might otherwise be effective.

Sincerely,

A handwritten signature in blue ink, appearing to read 'M. Simmons', with a stylized flourish at the end.
