

02 January 2025

To whom it may concern:

Inline Plastics Corp. produces recyclable single-use, thermoformed plastic containers by heating and molding plastic sheets into various shapes and sizes. Inline Plastics requires vendors that supply the only ingredient of PET plastic to be Kosher certified. The plastic is processed through a 500-to-600-degree F oven and then it is molded and formed into containers. No additives, food or animal products are used in the process. There is no chemical synthesis, Kosher plastic is simply reshaped into a container.

Sincerely,

A handwritten signature in black ink that reads 'Julie A. VanBenkom'.

Julie VanBenkom
