First
tamper protection in both PET and polypropylene product lines

The Inline Way:
Pairing Family with Innovation

Family evokes tradition and stability. Innovation, on the other hand, is ground-breaking and outside the lines. At Inline Plastics, our culture bridges these two, creating an environment where our family business fuses our core values with a passion for creativity and ingenuity. The result is new technologies backed by an over 50-year commitment to quality and service. This balance allows Inline Plastics to continuously bring new packaging solutions to the marketplace, while maintaining a family atmosphere for our employees, our suppliers, and our customers.

The Next Generation

My father and uncle founded Inline Plastics in the 1960's. Thirty years later, I came on board. And in 2018, my daughter, Alicia Orkisz Fitze, joined the organization. Through decades of growth and change, ownership and control by the Orkisz family has remained consistent.

With this catalog, we are excited to reveal the latest in a long history of new product releases with the launch of Safe-T-Chef®. Utilizing our patented tear-strip technology, Inline is releasing the first tamper resistant, tamper evident, and leak resistant polypropylene product offering designed for hot food applications. A new facility in Conyers, GA, one of our five locations, will manufacture a complete polypropylene line featuring a wide variety of options in various shapes, sizes and capacities—with more items to follow soon!

We Care

Families take care of each other. Innovation provides new tools to make that easier. From our Innovation Center, to sales and marketing, as well as manufacturing, we integrate the latest technologies to create exceptional products backed by the highest customer service.

We also care about improving the world around us. This extends from the simplest, making life easier for a consumer, to large-scale initiatives that reduce environmental impacts. All Inline PET products are made with 10% post-consumer content, and manufactured using the lowest carbon footprint. All Safe-T-Chef® products are made with all clear polypropylene, making it easy to sort through materials recovery facilities (MRFs).

We look forward to working with you!

Join Us

Use this catalog to get started. It is full of all the details on our extensive family of products. Then reach out to our teams at InlinePlastics.com, or our Chief Fun Officer, Lemon at lemon@inlineplastics.com for more information and next steps. The Inline family is ready with innovative solutions for all your packaging needs.

Thomas Orkisz

Tom Orkisz

Over 50 Years of Experience

1968
Inline Plastics is incorporated by Rudolph and Gene Orkisz

1985
Inline Plastics launches SureLock® technology

1988
Inline Plastics receives first patent for a locking mechanism

1999
Tom Orkisz becomes Owner, President and CEO of Inline Plastics

2003
The opening of Inline Plastics Salt Lake City, UT Plant

2006
Launch of first Safe-T-Fresh® line, after receiving official patent

2009
The opening of Inline Plastics McDonough, GA Plant

2018
Refreshed branding and website to coincide with the future vision of the company

Orkisz Legacy Continues: Third Generation, Alicia Orkisz Fitze, joins the Inline team

2020
Two important launches:
- Reborn, all PET products made with 10% post-consumer content
- Refreshed smooth, modern design to the medium and large Safe-T-Fresh® Rectangles

2022
Safe-T-Chef® launched, the first tamper evident, tamper resistant, leak resistant family of polypropylene products

Opening of new Inline Plastics polypropylene plant in Conyers, GA and new manufacturing plant in Gladwin, MI

Packaging for a Better Planet

reborn at 🆔 InlinePlastics®

PACKAGING FOR A BETTER PLANET

Inline Plastics is the first thermoformed food packaging manufacturer to utilize post-consumer content made with cutting edge technology called Advanced Recycling.

We call this PET material rDPET (recycled Direct to Sheet PET). Through our 'reborn' process, all of our PET products are made with 10% post-consumer content.

1 Post Consumer

2 Advanced Recycling

The advanced recycling process breaks down post consumer flake into its molecular building blocks: PTA & MEG molecules

PTA + MEG

3 rDPET™

These post consumer molecules are then polymerized with virgin ones using an environmentally friendly 'direct-to-sheet' process

4 Product

RECYCLABLE*

Through this proprietary process plastic can be turned into clean, new plastic again and again, preserving quality, so it doesn't have to end up in a landfill

PLEASE RECYCLE ME

Our thermoforming production is powered in part by solar panels

*Products may not be recyclable in all areas yet; please check locally

By using rDPET™ vs. traditional PET, Inline Plastics...

Diverts over **1 Billion** **water bottles** from the ocean and landfills annually

⚡ = 🌲🌲🌲 **or** 🚗

Generates over **50% energy savings** when producing rDPET™

Decreases carbon footprint equivalent to **112,000 acres** of forest per year

Saves greenhouse emissions equal to **233 million miles driven**

rDPET™ is a high performing food-grade packaging material reborn with 10% post-consumer content and the lowest carbon footprint on the market today

Safe-T-Fresh®

Vented Options

Our vented line has strategically placed vents to accommodate air flow and prevent excess moisture or pressure from building up in the package causing food to spoil. We have four variations to adapt to multiple product needs. They consist of narrow, channel, microvents, and recessed vents.

Types of Vents

Narrow Vents

Side and bottom vents allow moisture and gases to escape and maintain the freshness of herbs, fresh vegetables, and uncut fruit.

Channel Vents

Large vents in the seal area enable airflow through the package. Great for produce needing excess air.

Microvents

These unique microvents allow food gases to escape, maintaining product freshness.

Recessed Vents

One to two notches located opposite the hinge. Great for sandwiches with excess condensation.

Note: Item numbers ending in V or VT stand for vented.

Muffin and Cupcake Dimensions

Example:
ID 2-1/8 x 2-3/8 x 5-5/16 equals
(a) base diameter x (b) crown diameter x (c) height

Mini muffins are generally 1-2 oz
Standard size muffins are generally 4.5–5.5 oz
Large/Jumbo muffins are generally 6 oz and above

Base Diameter (a) x Crown Diameter (b) x Height (c)

c. Height

_____

b. Diameter at crown (widest part)

_____

a. Diameter at base of muffin

What's in the oven? Stud muffin.

What a looker! Clearly top shelf.

Merchandising Made Crystal Clear

Our advanced seal design controls moisture to keep food fresh

Perimeter Seal
Enhances shelf life and keeps food fresh

Enhanced Clarity
Puts food center stage and increases impulse consumer purchases

Efficient Stacking
Efficient and stable stacking allows for eye-catching product displays

Intuitive Design
Textured grip tabs allow for easy opening

Freezer	Good	Fair	Good
Refrigerated	Excellent	Very Good	Excellent
Heat Lamps	Poor	Good	Excellent
Microwave	Poor	Fair	Good
Oven	Not Recommended	Not Recommended	Not Recommended

[1] Temperature specifications may vary depending on components used to make raw materials.

Disclaimer: We strongly recommend that customers test products under their specific conditions to determine fitness for use. Please feel free to obtain free samples through our website, inlineplastics.com, or contact your Inline Plastics' representative.

How to Measure our Packaging

width

length
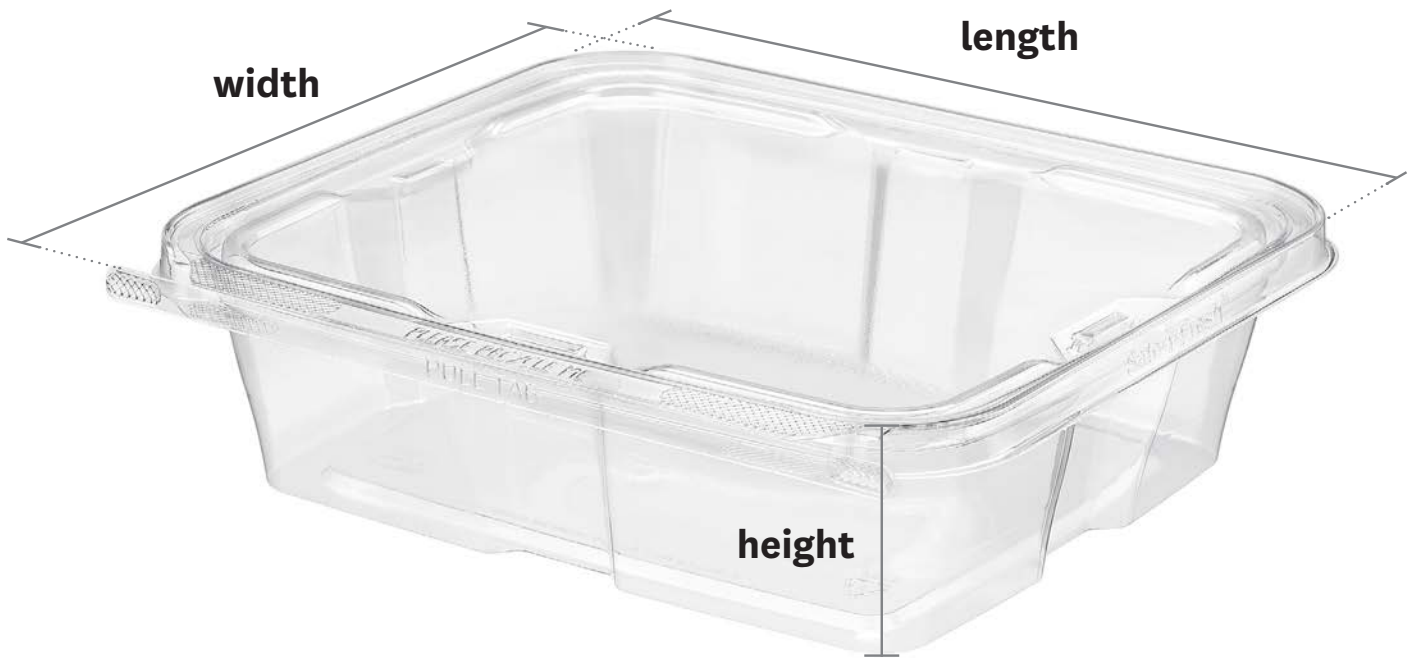

height

Standard volumes listed are base + lid volumes combined. These are in fluid ounces.

All IDs are measured at the hinge line.

The IDs for circular compartments (cupcakes, muffins, pies) list bottom diameter, top diameter, and height including lid. Outside Dimensions (OD) are consistent with the diagram, and are listed in order of Length (along hinge) x Width x Height.

Purchase Order Requirements

All purchase orders must be written for a minimum of 500 (combined) cases to one delivery location in order to qualify for prepaid freight. Safe-T-Fresh® items must be ordered in full pallet quantities per item. The minimum item order quantity for all non-Safe-T-Fresh items is one full pallet layer with the exception of CC2R, CC4R, and CCLR which may be ordered by the case. Orders for less than 500 cases will be subject to a $100 administration fee and the Customer agrees to pay the full freight charge. Inline Plastics reserves the right to select the carrier, routing and rates for shipments less than 500 cases.

Purchase Order Lead Time

Orders for stock items are generally available to ship within 10 business days of Purchase Order confirmation date by Inline Plastics. Confirmation is sent within 24 hours of the receipt of the Purchase Order. Weekends and holidays do not count as business days in lead time calculations. Please contact our Customer Experience team for the lead time on non-stock items.

Purchase Order Policy

Purchase Orders must be in writing and include the following information:

1. Inline Plastics item number
2. Number of cases ordered
3. Price per case
4. Purchase Order number
5. Requested delivery date
6. Delivery address
7. Delivery appointment contact information
8. Customer's e-mail (and fax number if applicable)

Email the original Purchase Order and any revisions directly to:
customerservice@inlineplastics.com
To arrange EDI transactions, please call to speak with a representative at
800-826-5567

Purchase Order Match

Prior to submitting an order with Inline, please ensure all Purchase Orders reflect the correct prices. Orders submitted with incorrect prices may result in a delay until the discrepancy is resolved. Inline will attempt to resolve any discrepancies in a timely manner.

Customer Pick-Ups

Customer Pick Up (CPU) is available at Inline Plastics' discretion. Please contact Customer Experience to make any arrangements.

Invoicing

Terms: 1% 10, Net 30 days from date of invoice.

Product Warranty

Inline Plastics warrants that all products are manufactured free of defects in workmanship. Inline makes no warranty of any other kind, expressed or implied.

Shipping Policy

1. Orders within the continental U.S. and Canada are shipped prepaid freight with Inline's standard transit lead times for orders meeting the minimum requirements.
2. The maximum number of full pallets that can fit in a truckload (53' Trailer) is 30.
3. Upon receipt of a shipment any discrepancies regarding shortages and/or damages must be noted on the POD and BOL. For all shortage claims, the claimant must file the claim within nine months of the shipment date.

Return Goods Policy

1. No return items will be accepted without prior approval.
2. Return freight is the responsibility of the Customer for all returns due to overstock, wrong product ordered or other Customer related issues.
3. Items must be returned within six (6) months from shipment and invoicing by Inline.
4. All items being returned must be in good condition, in original unopened cartons, without any damage to the product; otherwise it will be refused for credit.
5. Once a product return has been approved, Customer is issued a Return Authorization Number (RA Number), and advised of the amount of the credit that may be issued by Inline upon receipt of RESALEABLE* product pending QA inspection.
6. The amount of credit issued by Inline will be the price paid by the Customer less the following:
   a) A 20% restocking fee
   b) The freight cost incurred by Inline to ship the product from the Customer's warehouse back to the originating plant
   c) Any product rejected during QA inspection
7. Embossed or special order items may not be returned.
8. All requests for Return Authorization should be directed to Customer Experience, 800-826-5567 or customerservice@inlineplastics.com.

*Resaleable product must pass Inline Plastics' Quality Assurance inspection.
