

INNOVATING WITH PURPOSE: **SAFE-T-CHEF®**

Imagine a world where your hot, delicious takeout arrives as fresh and secure as the moment it left the kitchen. That's the reality Inline Plastics has been cooking up for over 55 years!

For more than five decades, Inline Plastics has been whisking together a perfect recipe for success. Their secret ingredient? Putting customers at the heart of everything they do. With a generous dollop of relentless innovation and a hearty serving of exceptional service, they've been satisfying appetites for quality packaging across the industry. And let's not forget their special seasoning - a commitment to sustainability that adds

that extra flavor to every product they serve up. Inline Plastics doesn't just follow recipes - they write them! Their five strategically placed U.S. manufacturing facilities ensure their safety solutions are always fresh and ready to serve, delivering products right where they're needed.

So next time you're savoring that perfectly delivered meal, remember there's a good chance Inline Plastics helped make it possible. Because when it comes to food safety and customer satisfaction, they're always cooking up something good!

Safe-T-Chef®

Safe-T-Chef® isn't just another item on the menu – it's the hottest thing in cool packaging! As the first polypropylene packaging product line with patented tamper protection designed specifically for hot food applications, Safe-T-Chef® is truly one-of-a-kind. It keeps warm and prepared foods safe and secure, whether they're chilling on the shelf or going for a ride with third-party deliveries. With high clarity and a modern design, it's as pleasing to look at as it is protective. And let's not forget the patented tear-strip technology that says "hands off!" to potential nibblers.

Safe-T-Chef® represents more than just innovative packaging; it's the culmination of Inline Plastics' decades-long commitment to keeping your food safe and your trust intact. It's the latest chapter in their long history of market-leading solutions, always with customer satisfaction in mind. Safe-T-Chef® by Inline Plastics is a revolutionary line of food packaging, as the first polypropylene product family with patented tamper protection in its category, Safe-T-Chef® combines superior safety with convenience.

Safe-T-Chef® Anti-Fog

Inline Plastics is known for setting industry standards for tamper protection, they've now tackled a common frustration: fogging when packaging hot foods. Safe-T-Chef® vented options now include the new anti-fog feature. No more guessing what's inside or struggling to see the details of your potential purchase. This breakthrough isn't just about aesthetics, though it certainly makes food look more appealing. The anti-fog technology ensures that even when packaging hot foods, the steam doesn't obstruct the view. Vibrant colors and textures of fresh ingredients remain visible, enticing customers and potentially boosting sales. Inline Plastics didn't stop at solving the fog issue. They've also kept sustainability in mind. The all-clear design of Safe-T-Chef® packaging makes sorting for recycling easier, aligning with the company's commitment to environmental responsibility.

Inline Plastics continues to prove that they're not just keeping up with industry needs; they're anticipating and solving problems before customers even realize they have them. It's this forward-thinking approach that keeps them at the forefront of food packaging innovation. The Safe-T-Chef® line, with its new anti-fog feature, is setting a new standard in food packaging. It's a clear example of how Inline Plastics is dedicated to enhancing both the consumer experience and the visual appeal of packaged foods, all while maintaining their unwavering commitment to safety and sustainability.

NEW: Safe-T-Chef® Flat Lid

Inline Plastics is revolutionizing food packaging once again with their latest Safe-T-Chef® innovation: a sleek, non-domed flat lid. This new design caters to foods that don't require extra headspace, offering a full, appealing appearance that's sure to catch the consumer's eye. Despite its low profile, the new lid doesn't compromise on Safe-T-Chef®'s renowned features. It retains the patented tamper protection, exceptional clarity, and reliable leak resistance that consumers trust. What's more, these flat lids bring added benefits: improved stacking capabilities and increased stability during transport.

This expansion of the Safe-T-Chef® line isn't just about a new lid shape—it's about creating new possibilities. It offers enhanced merchandising opportunities and greater versatility, allowing customers to choose the perfect packaging solution for their specific needs. With this innovation, Inline Plastics once again demonstrates its commitment to meeting the evolving demands of the food packaging industry, proving that sometimes, the best way to think outside the box is to redesign it.

PUTTING CUSTOMERS *AT THE HEART OF EVERYTHING* THEY DO.
