## **Security Policy/Product Defense**

**Inline Plastics Corp.** follows a corporate site security and product defense plan for preventing product adulteration that can be caused by, but not limited to, sabotage or terrorist activities.

The product defense plan includes provisions to secure each manufacturing site against unauthorized entry, including locked outside entry points, controlled badge access, verification of all deliveries and strict visitor policies. All chemicals within the manufacturing facilities are securely stored and accessible only to authorized employees. In addition, tamper-evident seals are used to secure shipments of finished goods. Each **Inline Plastics Corp.** manufacturing site performs an annual challenge of the product defense plan.

Customers must make their own determination that the use of the product(s) is safe, lawful, and technically suitable in the intended applications.

This certificate is continuing and shall remain in full force and effect until revoked in writing. This version supersedes all previous certificates that might otherwise be effective.

Sincerely,

A handwritten signature in black ink that reads 'Julie A. VanBennekom'.

Julie VanBennekom  
Corporate Quality and Compliance Manager  
Inline Plastics Corp.
